Art Unit: 1751

The preliminary amendment filed 11/03/05 is entered.

Claims 1-14 and 41-45 are currently pending.

Applicant's election without traverse of Group I and species I(a) (figure 3A) in the reply filed on 11/03/05 is acknowledged. Claims 2-14 and 43-45 are withdrawn from consideration as drawn to non-elected species.

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 41 and 42 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1751

In each of claims 1, 41, and 42, applicant should amend the terminology "selected from" to proper Markush language -- selected from the group consisting of--.

Also, claim 42 is indefinite in that some of the recited formulae (e.g. I(g)-I(j)) do not meet the proviso requirements at end of claim 41.

Additionally, claim 41 does not define the value "X".

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 41 and 42 are rejected under 35 U.S.C. 102(b) as being anticipated by either Kuder et al (J. Organic Chem, vol 44, no5, 1979) or Renfer et al (U.S. 6,004,709).

Kuder discloses the claimed compound at page 762 (Table compound 1) when R1 and R2 = C2H5, R3 = CH3, x = H and Z = H.

Renfer discloses the claimed compound at Col 20, lines 50-60).

The references are anticipatory.

Claims 1 and 41 are rejected under 35 U.S.C. 102(b) as being anticipated by Borsenberger et al (JJAP Vol 25 1996).

Art Unit: 1751

Borsenberger discloses the claimed compound in Fig 1 (page 2699) when R is any disclosed. Note that the instant claims specify Ar as "aryl or heteroaryl". The specification defines such as either substituted or unsubstituted (page 4 of spec).

The reference is anticipatory.

In view of the foregoing, the above claims have failed to patentably distinguish over the applied art.

The remaining references listed on forms 892 and 1449, including those listed on the provided Search Report 210, have been reviewed by the examiner and are considered to be cumulative to or less material than the prior art references relied upon in the rejection above.
